MountainView.gov Redesign

City of Mountain View, CA

Judges' Comments

"Loved the graphics and the ease of navigation. I looked for specific information and found it very quickly. I know from experience how difficult it can be to edit down an old website and retrain departments to have the resident/user oriented approach to the content, including the language, photos, and graphics used. Very well done!"

Silver Circle Winner

NorthPortFL.gov - Redesigned with residents in mind

City of Northport, FL

Judges' Comments

"Reducing the size of a municipal website is no easy task - job well done! I also appreciated the inclusion of staff time in the total cost, most of the time it's left off but it's important to include."

Award of Excellence Winner

The City of Cleburne's Website Redesign

City of Cleburne, TX

Judges' Comments

"Wow, what an improvement from the old website! Great job with utilizing a small budget for a big impact. The use of photos from your community was appealing and helped convey the sense of place."

Overall Website 200,000+

Sunken Gardens Website Development

City of St. Petersburg, FL

Judges' Comments

"Very insightful and creative to take one of their top visited webpages and turn it into its own site. It struck me as risky, but the end product is awesome and well worth it. The

rebranding looks amazing. Well done all around. The site is simple and informative while being visually appealing."

Silver Circle Winner

Minneapolis Forward, Stories From the Community of Rebuilding and Economic Recovery.

City of Minneapolis, MN

Judges' Comments

"The length of the videos are short and digestible. A nice range of stories were represented. Easy to follow, had a good flow to it. A great use of the StoryMap platform."

Award of Excellence Winner

Organization-Wide Websites Project

City of Kansas City Aviation Department, MO

Judges' Comments

"The large scale of the undertaking was clear. There was obviously a great deal of thought for the audience/user and future use of the websites and technologies. Impressive. The end product is sleek, appealing, user friendly, and modern."
